

Wassertek

Wassertek is a global supplier and manufacturer of premium quality crowd control gates, reflective gates with solar illuminating technology, tools, machinery and the most innovative stainless steel auto sliding gates having corporate offices in United Kingdom & all over Northern America.

We are renowned for maintaining quality measures and our factories have been certified worldwide in line with the latest international standards. Our gates and the technology have been appreciated and are running successfully in airports, theme parks, factories and road transport system.

“Made by Wassertek” itself ensures guarantee to our customers.

The Wassertek Research & Development Centre in United States is the worldwide technological hub of our growing and prospering group. Our emphasis for R & D is significantly higher than trade average and as a result we are recognized for producing most innovative and futuristic free standing gates up to 240,000 mm in running length.

Wassertek has a wide network of distribution partners and service centers worldwide to cater the needs of our existing clientele in the fastest and most effective way. The number of business associates are growing day by day and we focus to cover the entire globe by the year 2020.
