

WASSERTEK LTD., CANADA Chemical Division

Offer innovative, practical & cost effective Chemical Solutions for

**Waste Water Treatment | Desalination/R.O. Water Treatment | Cooling Tower Water Treatment
Boiler Water Treatment | Oilfield Chemicals | General Chemical Products**

WASSERTEK is known worldwide for producing and trading highly innovative chemical products used in treatment of Industrial Water, Potable Water, Effluent Waste Water, Gas & Oilfield Chemical requirements (Upstream & Downstream) . Widely used also in all major manufacturing industries including:

**Oil & Gas - Rigs, Wells & Platforms | Petroleum Refinery | Petrochemical Plants
Power Plant | Fertilizer Plant | Chemical Processing Plants | Metal Processing Plants
Paper Mills | Pharmaceutical Plants | Lubricants & Coolants | Food Processing**

All WASSERTEK Chemical products confirm to the highest technical quality/performance based on the Northern American standards backed up with excellent dealer and sales network globally. The office in Dubai, UAE is a key hub for fast and effective sales/after sales services catering the needs of MENA Region.

Product Portfolio

WASTEWATER TREATMENT

- Antifoams
- Defoamers
- Flocculants
- Coagulants (High Performance Anionic & Cationic)

COOLING TOWER WATER TREATMENT

- Biodispersants
- Biocides
- Inhibitors to Control Scale, Corrosion & Fouling
- Microbiological Control Systems

OILFIELD CHEMICALS

- Antifoamers
- Asphaltene Corrosion Inhibitors
- Biocides
- Corrosion inhibitors
- Demulsifiers
- Gas Corrosion inhibitors
- H₂S Scavengers
- Oxygen Scavengers
- Paraffin Control
- Scale Control

DESALINATION / R.O. WATER TREATMENT

- Antifoams
- Oxygen Scavengers
- RO Antiscalants

BOILER WATER TREATMENT

- Alkalinity Builders/ pH Control
- Defoamers
- Filming, Neutralising & Combined Amines for Condensate Treatment
- Inhibitors to Control Scale, Corrosion & Fouling

GENERAL CHEMICAL PRODUCTS

- Aluminium Sulphate (Non-Ferric) – Powder / Lumps
- Ammonium Bisulphite 65% (Oxygen Scavenger)
- Benzalkonium Chloride 50% & 80%
- Ferric Chloride – 40% Liquid / Powder
- Formaldehyde 37% Solution
- Hydrochloric Acid – 32 To 37%
- Liquor Ammonia – 25% Solution
- Polyaluminium Chloride – Liquid / Powder

Chemical Division - Middle East Representative Office

Premises No. 150, Jebel Ali Industrial Area No. 1, PO Box: 47067, Dubai, United Arab Emirates.
